

Our Trip to the Movie Park

This is a story of us, 2 SMA of Natural Science consisting of Amr, Nadia and Yumi. We would like to share our study tour experience at the Movie Park, Germany.

The day that we had been waiting for finally came! On

Monday, 17th March 2008, the whole school (SIN) went to the Movie Park in Germany. We left SIN around 8 o'clock with a tour bus. The trip took about 2,5 hours. We spent our time in the bus with singing, joking around, playing with teachers' kids, playing games, and eating the snacks. There were so many snacks and all of them were very delicious!

After we arrived, we immediately grabbed our bags and ran outside. At the main gate, we took a picture together. After that, we couldn't wait longer because we had to go to the bathroom. Out of the bathroom, we all formed one big group and started to explore the Movie Park. The first attraction that we played was the NYC Transformer, but Yumi and Nadia didn't play it because it was too scared for both of them. We couldn't imagine that our body was spinning around and being upside down.

The second attraction was our favourite attraction. It was the High Fall. With protected seatbelts and shoulder clamps we were lifted on a special seat 60 meters high with our feet swinging free around. After that, with a speed of 90 km/hour, we went down in a free fall. It was a breathtaking experience. We felt free after that.

Our next destination was the MP Express. Nadia and Yumi didn't play it again because there were 3 loops and they were very afraid of that. Near the MP Express was The Bandit, a jet coaster with a long track but without loops, so all of us took this attraction.

Screaming and having fun at this attraction made us hungry, so we had lunch at the park. Around that park there were some shops, so that we could buy some souvenirs there. Outside the shops, there were some Nickelodeon figures that we took pictures with.

At 2 p.m., we went to the Movie Magic with the teachers. We saw how to make a short movie with special effects. This attraction took quite a long time, about 45 minutes. We continued our exploration to splashing areas like the Bermuda Triangle, Ice Age, and Mystery River. We got a little bit wet after that but nothing could stop us to continue our exploration, so we went to the Time Riders, which made us felt curious to get in. We had to stand in a queue. Unfortunately, Nadia left behind together with 5 other SIN kids. At the Time Riders we were put in a small spaceship with many seats and seatbelts. All of us took a seat, and saw a big screen in front of us. At the screen we saw a professor explaining us that he would take us to a time journey. When he started to count of from 10 till 0, the spaceship began to vibrate. It felt like we were in a real spaceship and it was very fun.

The next attractions that we took after the Time Riders were the Jimmy Neutron, Crazy Surfer, Side Kick, and at last The Bandit again. Jimmy Neutron was the same as the MP Express, but less scary. It was like *odong-odong*. The Crazy Surfer was a little bit scarier

because at this attraction, we sat on a seat at a big round disk that was spin around from left to right. The Side Kick had made all of us sick, we felt dizzy and queasy. We didn't like this attraction. There was still a little time left before went back to the bus, so some of the kids took The Bandit again. Nadia and Yumi didn't ride this one, because we were too queasy. So we had a better optional to made our self better, by taking our pictures to keep this trip for the memory.

After all, the time was over. We had to go back to the bus at 5.30 p.m. Since everyone was already in the bus, we straight away left the Movie Park and went back home. In the bus, most of us were sleeping because we were tired. Finally we arrived at our lovely school, SIN, at 8.30 p.m. We felt sad because our great day had to end. We had so much fun and it was an unforgettable moment!
